1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 6-10 rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The hard coating having a columnar crystal layer comprising at least one material selected from the group consisting of a carbide, a nitride, and a carbonitride of titanium, the column crystal structure layer contains particles having crystal particle diameters in a direction horizontal to the interface between the hard coating and the base material are large and the particles having crystal particle diameters in the same direction are small, and the ratio of the average particle diameter of the large particles to the average particle diameter of the small particles is 3 to 50 is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The claim limitation that made the product claims allowable is critical.

3. Claims 6-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
